VIP attracted two investors in the automotive supply industry; do you favour them in any way?

- All investors that wish to relocate their operations or start a new business in Vojvodina are welcome. VIP favours neither investors, nor municipalities striving to attract them. It is, however, a fact that one of the identified development sectors in Vojvodina is automotive supply industry, and also that we have worked very hard on developing contacts with investors in this sector. Now we can announce the opening of a plant by the German company *Draexlmaier* in Vojvodina's municipality of Zrenjanin. *Draexlmaier* is a manufacturer that supplies components to the world's leading companies (Mercedes – Benz, BMW, AUDI, Maybach, Bugatti) for their best-selling models. The company has production plants at 52 locations in 17 countries on four continents, employs 38,000 people and has recorded success in the world market year after year. During 2008, it plans to invest several millions of Euros and to hire one thousand people in Zrenjanin.

In this field, Vojvodina has a lasting tradition that has also been recognised by the German company *Bauerhin*, which manufactures car seat heaters in the municipality of Indjija, also for renowned car manufacturers.

VIP is currently preparing a sector study in cooperation with the Auto Cluster Styria. The study will provide an overview of opportunities and potentials of Vojvodina in the automotive supply industry in order to attract as many investors in this sector as possible.
