

Međunarodna orijentacija DUNAV GRUPE

DUNAV GRUPA, nastala 2006. godine, jedinstveno je ime za poslovni sistem kompanija povezanih zajedničkom poslovnom filozofijom koja obezbeđuje uspešno poslovanje preko svojih zavisnih kompanija u delatnostima:

- Eksploatacije šljunka i peska sa rečnog korita reka Dunava i Save i njihovih pritoka,
- Rečnog transporta svih vrsta građevinskih materijala, njihovom prodajom na veliko i malo,
- Izgradnje i rekonstrukcije svih vrsta hidrograđevinskih i vodoprivrednih objekata,
- Izgradnje i rekonstrukcije i saobraćajnih objekata niskogradnje.

Sa 1.300 zaposlenih, kvalitetnim i stručnim kadrom da brzo i efikasno rešava probleme, DUNAV GRUPA ostvaruje svoju tržišnu prednost i garantuje dugoročni opstanak na tržištu.

Sertifikacija

Praćenje tehnologija i iznalaženje modernih domena struke su osnovni postulat poslovne politike DUNAV GRUPE. Osim postizanja veće konkurentnosti u pružanju usluga na tržištu, ona se ogleda i u razvoju i unapređenju kvaliteta istih.

U skladu sa tim, u AD Vojvodina-pup-Zrenjanin 2003. godine sertifikovan je sistem menadžmenta kvalitetom prema zahtevima standarda ISO 9001:2001, dok je u 2008. godini kompanija uspešno sertifikovala i sistem upravljanja zaštitom životne sredine, saglasno standardu ISO 14001:2004, kao i sistem menadžmenta zaštite zdravlja i bezbednosti na radu, saglasno specifikaciji standarda OHSAS 18001:2007.

Realizacijom navedenog, stvoreni su bitni preduslovi za uspešno uključivanje kompanije na međunarodne tendere kao ravnopravnog konkurenta inostranim preduzećima i širenje tržišta ka zemljama EU, što je plan menadžmenta u narednom periodu.

Informatika

Paralelno sa uvođenjem i razvojem integrisanog sistema menadžmenta sopstvenim resursima razvijen je i informacioni sistem unutar kompanije. On danas pokriva sve poslovne procese organizacije i integrisan je u jednu celinu.

Informacioni sistem predstavlja sastavni deo ukupne strategije menadžmenta i razvija se kao centralni upravljački sistem koji je neophodan za efektivno upravljanje kompanijom. Kao osnova za izradu, korišteni su ustanovljeni zapisi

DANUBE GROUP, established in 2006, is a single name for a system of companies linked with joint business philosophy ensuring successful business operation through sister companies for the following activities:

- Excavation of gravel and sand from the riverbeds of the Danube and Sava rivers and their tributaries;
- River transport of all kinds of building materials, their retail and wholesale ;
- Building and reconstruction of all kinds of hydro engineering and facilities for water;
- Construction and reconstruction of civil engineering facilities.

With its 1300 employees, qualified to solve problems quickly and efficiently, DUNAV GROUP is realizing its market advantage and guaranties market positioning on a long-term basis.

Certificates

Technology development monitoring and finding the up-to-date professional domain are the basic postulates of DUNAV GROUP business policy. In addition to being more competitive in providing services in the market, we are focusing on development and quality improvement.

In accordance with this, in 2003, a quality management system was certified in AD Vojvodina-Zrenjanin in accordance with ISO 9001:2001, whereas in 2008, the company

certified environment protection management system in accordance with ISO 14001:2004., as well as health protection and safety at work management system in accordance with standards OHSAS 18001:2007.

By the realization of these tasks, basic preconditions were created for the Company to participate in international tenders as competitor with foreign companies, as well as for extending the market to EU countries, as it is planned by the management for the forthcoming period.

IT

Simultaneously with the introduction and development of integrated management system, information system was developed from own resources. Today, it covers all business organization processes and it is entirely integrated.

Information system represents a constituent part of the overall management strategy and it developed as central

Danube Group's International Orientation

integriranog sistema menadžmenta koji danas služi, osim za čuvanje zapisa o izvršenim radnim aktivnostima, i za kontrolu tokova radnih aktivnosti, merenje sposobnosti i poboljšanja, kao i upravljanje aktivnostima poboljšanja. Kontinualno se razvija u skladu sa zahtevima korisnika, kao i razvojem poslovnih procesa unutar organizacije.

Kompanije

Svoju delatnost DUNAV GRUPA obavlja preko zavisnih kompanija Dunav grupe agregati i Dunav grupe putevi.

Dunav Grupa Putevi, doo

Osnovna delatnost Dunav grupe putevi je rekonstrukcija i izgradnja saobraćajnih puteva, u čijem sastavu se nalazi AD "Vojvodinaput-Zrenjanin".

AD „Vojvodinaput-Zrenjanin“ osnovano je 1962. godine. Održavanje, rekonstrukcija i izgradnja puteva bili su delatnost na samom početku, a sada je svaki objekat niskogradnje izazov na koji ova kompanija, usmerena ka daljem unapređenju proizvodnje, investicionom opremanju novom građevinskom opremom i kadrovskom osposobljavanju, uspešno odgovora. Pretežna delatnost kompanije je: rehabilitacija, rekonstrukcija i izgradnja saobraćajnih objekata niskogradnje, ali pored navedenog u sklopu svoje delatnosti zadužena je i za redovno i zimsko održavanje magistralnih i regionalnih puteva na teritoriji srednjeg i severnog Banata. Putna mreža koju održava sastoji se od 335 km magistralnih i 332 km regionalnih puteva, što ukupno čini putnu mrežu dugu 667 km.

Održavanje magistralne i regionalne putne mreže na navedenim teritorijama sprovodi se iz punktova: Zrenjanin, Kikinda, Novi Kneževac, Perlez i Banatski Dvor. U okviru

on the sand and gravel market not only in the territories of former Yugoslavia and the Balkans, but it was also the biggest producer in Europe and ranking fifth by size in the world. Raw materials supplied by BBP Ltd. Belgrade – Danube Group Ltd. Belgrade enabled the construction of the largest part of New Belgrade, Nikola Tesla Airport, hotels Hyatt and Intercontinental, Hydroelectric Power Plant Đerdap and many other significant projects in the Balkans, East Europe and the Middle East. The Company has also extended its business operations to gravel screening, production of concrete and river transport.

- Heroj Pinki (HP), Novi Sad
- ◊ For nearly half a century of existence and successful business, the shareholders company Heroj Pinki Novi Sad has developed into one of the leading Serbian companies in the field of river transport of bulk and liquid load, as well as in building and reconstruction of all types of hydro-engineering facilities. The main activity in the last few years has been production, transport and sales of building materials - gravel and sand, including the transportation of all sorts of liquid loads on the Danube, Sava and Tisa rivers. The Company's Head Office is situated in Novi Sad on the bank of the Danube.
- Napredak Apatin, Apatin
- ◊ During four decades of existence and successful operation, Napredak Apatin, A.D. for piers, warehouses and hydro-engineering, has developed into one of the leading companies in the field of sand excavation and building and reconstruction of all types of hydro-engineering facilities.
- Hidrogradjevinar AD, Sremska Mitrovic
- ◊ During many years of its operation, Company Hidrogradjevinar a.d. based in Sremska Mitrovica, specialized in building of hydro-engineering and facilities for water economy.

Danube Group Roads, ltd

Main activity of Danube Group Roads, ltd (Roads) is the reconstruction and construction of roads.

The Group also includes company AD Vojvodinaput – Zrenjanin.

A.D. Vojvodina put – Zrenjanin was established in 1962. In the beginning, its activities were maintenance and reconstruction of roads. However, any civil-engineering facility is a challenge for this company thus making it to develop further its production, provide new machinery and equipment and train its personnel in order to cope successfully with the challenges.

Prevailing activities of the company are: revitalizing, reconstruction and construction of civil-engineering facilities. In addition, it is in charge for regular and winter maintenance

delatnosti kompanija se bavi i eksploatacijom peska, kao i proizvodnjom asfalta i betona.

Kapaciteti

Tokom 2007. godine kompanija je ušla u proces modernizacije i proširenja postojećih kapaciteta i opremljenosti proizvodnih kapaciteta i mašinskog parka, čime je efektivnost i efikasnost rada podignuta na još viši nivo.

Danas kompanija raspolaže sa savremenim postrojenjima za proizvodnju asfalta i betona: asfaltnim bazama kapaciteta 260t/h i 110t/h i betonskom bazom kapaciteta 60 m³/h, kao i savremenim postrojenjem za eksploataciju peska kapaciteta 250-300 m³/h.

Kompanija raspolaže i sledećom građevinskom mehanizacijom i transportnim sredstvima:

- Građevinska mehanizacija: autogrejderi (5 kom.), utovarivači (9 kom.), rovokopači (7 kom.), buldožeri (4 kom.), bageri (4 kom.), glodalice za asfalt (3 kom.), finišeri (5 kom.), reciklari (2 kom.), valjci (21 kom.), kao i veći broj manjih mašina i opreme;
- Transportna sredstva: kamioni kiperi (37 kom.), kamioni tegljači (13 kom.), kamioni sa rukom (2 kom.), autocisterne (6 kom.), mikseri (2 kom.), autobusi (9 kom.), kamioneti (19 kom.).

Savremena postojenja, mehanizacija i vozni park, uz kvalitetan i stručni kadar, kompaniji osigurava sopstvenu sposobnost i produktivnost u vršenju osnovne delatnosti i dalje jača poziciju na tržištu niskogradnje, sa mogućnošću širenja tržišta ka zemljama EU u okruženju, što je tokom 2008. godine i započeto, osnivanjem Kompanije „Banat Road“, sa sedištem u Temišvaru, Rumunija.

of main and regional roads in the territory of Mid and North Banat. Maintained road network consists of 335 km of main roads and 332 km of regional roads, making all together 667 km of road network. Maintenance of main and regional roads network is carried out from the following central points: Zrenjanin, Kikinda, Novi Knjazevac, Perlez and Banatski Dvor. Company's activity also includes sand exploitation and production of asphalt and concrete.

Capacities

During 2007 the company has started a process of modernization and extension of the existing capacities, as well as provision of equipment for production capacities and machinery. By this it has raised the output and efficiency of its operation.

Today, the company has modern plants for production of asphalt and concrete: asphalt unit capacity is 260 t/h and 110t/h, while the concrete unit capacity is 60m³/h. It also has modern unit for sand exploitation with the capacity of 250-300 m³/h.

The company also has the following building machinery and equipment and transportation means:

- Building machinery: automatic graders (5), loaders (9); excavators (7), bulldozers (4), draggers (4) grinders for asphalt (3), finishers (5), recyclers (2), rollers (21), as well as a number of smaller machines and equipment.
- Transportation means: dump trucks (34), trailers (13), arm trucks (2), tankers (6), mixers (2) buses (9) pick-ups (19)

Modern units, mechanization and vehicles, together with qualified and professional personnel, ensures the company's capabilities and productivity in performing its core activities and strengthens its position on the civil-engineering market, with possibilities to spread to EU and neighboring markets, which has already started in 2008 by founding a new company Banat Road, based in Timisoara, Romania.
