

Prednosti investiranja u Srbiju

Srbija je zemlja pogodna za investiranje, kako u sektoru nekretnina i usluga, tako i u proizvodnju.

Njeno tržište ima visoku stopu razvoja, a centralni geografski položaj u regionu daje joj stratešku prednost i visoku konkurentnost. Bankarski sektor je stabilan, poreski sistem veoma dobar, radna snaga je kvalitetna, cene nisu visoke, ljudi su gostoljubivi, poslovni ambijent se popravlja iz dana u dan...

Lepo je živeti u Srbiji. Srbija, zapravo, predstavlja „vrata“ između jugoistočne, zapadne i centralne Evrope i nalazi se na trasi dva važna internacionalna transportna koridora, koridora 10 i koridora 7.

Srbija učestvuje u Centralno-evropskom ugovoru o slobodnoj trgovini CEFTA. Time je preko Srbije stranim investitorima otvoren bescarinski pristup potencijalnom tržištu sa više od 30 miliona potrošača. U isto vreme, centralni geografski položaj Srbije je prednost koju proizvođači mogu da koriste za lak i brz pristup tržištima Evropske unije i susednih zemalja.

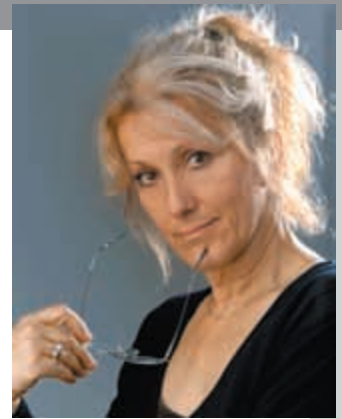

Uz sve to, Srbija je jedina zemlja van granica Zajednice nezavisnih država, organizacije država nastalih raspadom Sovjetskog Saveza, koja uživa bescarinski pristup tržištu Ruske Federacije od 145 miliona potrošača. Povlastice važe kako za domaća, tako i za strana preduzeća registrovana u Srbiji. Takav sporazum je potpisan i sa Belorusijom.

Osigurana evropska budućnost čini je još atraktivnijom. Ovo sve oslikava razloge zbog kojih treba krenuti u Srbiju, naročito u ovo vreme kada u svetskoj ekonomiji ima mnogo teškoća.

Ulaganje u tržište sa visokim potencijalom rasta kao što je Srbija, upravo sada, investitoru će doneti velike prednosti u skorij budućnosti.

Advantages for Investing in Serbia

Serbia is a country suitable for investments, both in real estates and services sector and in agriculture.

Serbian market has big development rate, and its central geographic position in the region provides Serbia with strategic advantage and very competitive position. Serbia has stable banking sector, very good tax system, qualified labor, moderate prices, hospitable people and its business climate is improving from day to day...

It is nice to live in Serbia. Actually, Serbia represents a "gate" towards South East, West and Central Europe and it is located on the route of two important international transportation corridors, corridor 10 and corridor 7.

Serbia is a party to the Central European Free Trade Agreement - CEFTA. In this way, foreign investors can have through Serbia a customs free access to a market encompassing over 30 million consumers. At the same time, central geographic position of Serbia is an advantage that can be used by producers to access easily and quickly the European Union market, as well as the markets of neighboring countries.

Besides this, Serbia is the only country outside the Confederation of Independent States, organization of states created after the dissolution of former USSR, which enjoys the customs free access to the market of Russian Federation having 145 million consumers. Both domestic and foreign companies registered in Serbia are eligible to use these facilities. The same agreement was also signed with Belorussia.

Ensured European future makes Serbia even more attractive. All these are the reasons to reach for Serbia, in particularly in these days when the world economy is faced with so many problems.

Timely investments into the markets with high growing potentials, such as the Serbian one, will bring great advantages to investors in near future.
